

PRESS RELEASE

7th October 2009

PEIKKO TO DELIVER 1,5 KILOMETERS OF DELTABEAM FOR A NEW CITY HALL IN VIBORG, DENMARK

DELTABEAMS USED DURING 2009 IN ALREADY 44 PROJECTS IN DENMARK

Peikko Group's subsidiary in Denmark, Peikko Denmark, has signed a contract on Deltabeams with company DS Stålkonstruktion A/S, the biggest steel contractor of Denmark. The contract includes the delivery of 1,5 km Deltabeams in the project for a new city hall of the Viborg Municipality, in the Middle-Jylland, Denmark. In addition to Deltabeams, other Peikko concrete connections such as columns shoes will be used in the project.

The Viborg city hall has been designed by Henning Larsen Architects and COWI A/S was the responsible consulting engineer. The building consists of a total of 19.000 m² of space giving room to about 800 employees. Deltabeam was selected because it gave the most flexibility to enable the complex design of city hall's compact structure including also an internal atrium.

"Peikko has been successful in its efforts in Denmark since the founding of Peikko Denmark in 2006. The recent project of Viborg will be the 44th project in 2009 where Deltabeams are used and it is a good demonstration of how Danish builders appreciate the value of our product", states Raimo Lehtinen, Managing Director of Peikko Group.
