## **Structherm Fastbuild® gives advantage to new hotels**

When Elland based contractor, Marshall Construction Ltd, approached Structherm with plans for two hotels in the North of England, Structherm's Fastbuild system soon proved to be the obvious choice.

After considering the various build methods available, both contractor and client felt that Fastbuild offered many benefits, including unrivalled fire resistance, excellent airtightness and acoustics, no risk of shrinkage and speedy build times.

Orders for Fastbuild walls, floors, lift shafts and staircases for a Premier Inn in Halifax and a Ramada Encore in Gateshead were placed after Structherm's design team worked closely with Marshalls to provide the most appropriate solution for both of the schemes. This ensured that the Fastbuild system was not only a suitable build method, but that it would also offer the necessary high quality build required.

Both projects expect to commence on site in the next few weeks, with completion later in the summer 2011.

**\*\*End\*\***

### **Notes to Editors:**

*Structherm Ltd – part of the Hanson HeidelbergCement Group - has been providing solutions to the construction industry for over 25 years. Our technical expertise in the manufacture and supply of innovative building solutions (Structherm Fastbuild® precast concrete building system, external wall insulation and structural insulated cladding) combined with comprehensive support throughout the construction process is unrivalled.*

*Hanson Building Products is one of the world's largest suppliers of heavy building materials to the construction industry. Hanson produce aggregates (crushed rock, sand and gravel), ready-mixed and precast concrete, asphalt and cement-related materials and a range of building products including concrete pipes, concrete pavers, tiles and clay bricks.*

*Hanson are part of the Heidelberg Cement Group, which employs 57,000 people across five continents, and has leading positions in concrete and heavy building products and is the global leader in aggregates.*
