

CONTEMPORARY PAVING FOR A MODERNO DESIGN

Brett Landscaping has added to its extensive range of paving products with the introduction of the Moderno range. Bringing a cool, sophisticated style to any garden, Moderno paving is ideal for transforming outdoor places into stunning and stylish living spaces.

Made to the finest tolerances, Moderno exudes quality and provides an ultra chic finish. Brett Landscaping's Moderno paving is available in three cosmopolitan colours; polished black, polished white and polished grey. The colours have been chosen so that when combined, stunning and contemporary patio designs are created. Alternatively the strong, bold colours can be used separately for a clean sophisticated appearance.

Zack Barrett, Marketing Services Manager at Brett Landscaping, comments; "Granite products are at the forefront of design at the moment and are definitely the hot product for the summer, so this effective imitation is high on consumer's wish lists. With more people predicted to holiday at home this year the up keep of their gardens is going to be a top priority. Our Moderno paving will add a touch of elegance this summer."

ENDS

Issue Date: 30th April 2009

Editor Notes:

Brett Landscaping is a major supplier of hard landscaping materials, sold almost exclusively through builders' merchants.

Ranges include block paving, decorative concrete and natural stone flag paving and decorative aggregates.

The commercial range includes paving and specialist kerbs, such as Trief and Kassel and the Brett Flow range of permeable paving solutions. These are all supported with a comprehensive customer service package covering design, delivery, technical, marketing and sales generation.
