Trimble Tekla UK
www.tekla.com/uk/solutions

Tekla software is a solution within the Trimble Buildings' Engineering and Construction offering, which gives industry the tools to transform planning, design, construction and operation of buildings. Tekla software is at the heart of the design and construction workflow, building on the free flow of information, constructable models and collaboration. Used in over 150 countries around the world, Trimble Buildings' solutions are transforming the way the world designs, builds and operates infrastructure and buildings.

Adfil Construction Fibres
www.adfil.com

Adfil Construction Fibres Part of Low & Boner PLC has over three decades of fibre reinforced concrete experience. Supplying over 60 countries worldwide. They have recently developed the New Durus EasyFinish Macro Synthetic fibre. With its improved embossment & high tensile strength, Durus EasyFinish is ideal for all precast & structural applications. "Reinforced concrete reinvented"

ArcelorMittal
www.arcelormittal.com/steelfibres

ArcelorMittal Fibres, part of the ArcelorMittal Group, is a global leader in providing reinforced concrete solutions, working with Engineers, Construction companies and suppliers of Precast and Ready-mix products on some of the most challenging projects in the world. ArcelorMittal Fibres do much more than manufacture and supply a comprehensive range of premium quality steel fibres. We support you with the right advice, the right fibres and the right solutions to ensure the success of your project from start to finish.

B&B Attachments
www.bandbattachments.com

Established for over 35 years, B&B Attachments Ltd is the leading fork lift truck attachment company in the UK and Ireland. B&B pride itself on providing the most comprehensive range of attachments available from one provider. BlockMaster from B&B Attachments is a complete range of specialist clamps for the brick, block, flag and kerb markets. The range incorporates many unique design features to ensure maximum productivity and safety when material handling.

BASF Plc
www.master-builders-solutions.bASF.co.uk

BASF Construction Chemicals remains at the forefront of the concrete industry delivering unrivalled solutions and reliable products that enhance the performance of concrete. Our global network of chemical experts helps drive the concrete industry forward with new products and solutions that provide superior quality and economic benefits for precast concrete producers

Beresford's Flooring
www.bfl.uk.com

Beresford's invent, produce and promote innovative products to enable many day-to-day site-based tasks to be completed more safely and efficiently. We work closely with onsite workers, listening to safety concerns arising when carrying out their daily jobs and tasks. We have looked into numerous working practices, accidents and near misses and developed a range of products to improve workers long term health, helping to prevent accidents and injuries occur on site, whilst improving productivity.

Besser Company
www.besser.com

Trusted since 1904, Besser Company is recognized as the leader for quality concrete products production systems for the masonry, hardscape, pipe and precast market segments of the industry. We provide the equipment, molds, parts, machine rebuilds, technical services, training along with assistance with proprietary unit development, and the testing/commercialization of recycled materials used in the production of concrete products.

Breedon Cement
www.breedongroup.com

Breedon Cement operates the UK's largest cement plant by capacity, capable of producing around 1.5 million tonnes of cement each year. It also imports cementitious products through two terminals in Scotland and northern England. Breedon Cement's four strategically-located rail-linked cement depots have more than a million tonnes of throughput capacity and its new state-of-the-art rail-linked facility at Dagenham produces a comprehensive range of packed cement products.

Carbon8 Aggregates Ltd
www.c8a.co.uk

Carbon8 use a patented process known as Accelerated Carbonation Technology to treat thermal residues arising from Energy from Waste plants, which when added to various binders and fillers produce a lightweight, carbon negative aggregate. Our aggregate is unique in that it captures more Carbon dioxide than is used in its manufacture, making it the world's first carbon negative aggregate. During the past year we have permanently captured more than 3500 tonnes of CO₂, making Carbon8 Aggregates Ltd one of the largest permanent carbon capture companies in the UK.

CDS Group
www.cds-group.co.uk

With an enviable track record of working with some of the world's largest concrete producers, CDS are industry leaders in the design and manufacture of Curing Systems, Curing Racks & Chambers and Acoustic Sound Rooms. Through ongoing research and product development, as well as the use of innovative technologies, CDS provide solutions that exceed the demands of concrete producers the world over.

CEMEX Admixtures
www.cemex.co.uk/admixtures

CEMEX is one of the world's leading providers of high-quality building materials. Owning its' own Admixture business enables researchers at CEMEX's Global Research and Development Centre to create pioneering concrete designs to meet the demanding performance requirements of today's construction industry. With an unrivalled history of innovative products CEMEX pride themselves on striving to continually improve and develop specialist concretes and admixtures, whilst being continually committed to solutions that are both sustainable and socially responsible.

Cenin Ltd
www.cenin.co.uk

Cenin Limited has secured ash supplies for future generations enabling us to continue manufacturing Beneficiated fly ashes especially designed for precast concrete sector. Our factory manufacturing process ensures our products are high performing and consistent. Cenin is accredited to ISO 9001 and ISO 14001. We are pioneering a new generation of alternative Fly ashes that are sustainable and will allow the development of more consistent and sustainable concrete products for use now and in the future.

Chryso UK Ltd
www.chryso.com

Innovation is our chemistry. A chemicals specialist at the service of construction materials, CHRYSO is active in more than 70 countries by means of its 20 subsidiaries around the world. CHRYSO provides its customers - cement manufacturers, concrete plants, precast manufacturers, and construction companies - with its formulation expertise and knowledge of construction materials. CHRYSO also provides a large range of aesthetic solutions for both precast and in situ concrete.

Command Alkon

Command Alkon UK
www.commandalkon.com

Command Alkon Solutions work with your Production plants to provide a total, automated solution for the production of Concrete Products, pre-stressed, block, pipe and all other manufactured concrete products. Our systems integrate with each other as well as with other industry-recognized applications, allowing you to rely on a single, reputable source for better control of your business functions from "Quote to Cash". Discover our wide range of solutions like Process Automation, Moisture Management, Quality Control and Administration, Planning and Scheduling, Materials Handling and GPS Telematics.

Concrete Technology Ltd
www.concretetech.co.uk

We provide machinery solutions for new factory installations and efficient updates to the Pre-cast Concrete Product Industry; providing solutions for all stages of manufacture, from production of high quality concrete, to bespoke handling and packaging of the finished products. We are agents for the following companies:

Cassani, Coote, KBH, Kraft Curing Systems, Maema, OCEM, R&W, Rapid International, Rekers, WASA AG / WASA Wetcast and Würschum.'

ConSpare

Make it better.

ConSpare Ltd
www.conspare.com

ConSpare work with customers to transform the concrete production process. Through a combination of industry leading high-performance components and unrivalled expertise we'll work with you to solve batch plant problems, from the start of the process to the finish. Resulting in improvements to productivity, safety and product quality. Work with ConSpare to Make it better: Material Storage, Conveying, Batching, Mixing, Discharging/Truckloading and Precast.

Construction Fixing Systems
www.cfs-fixings.com

CFS provides a comprehensive range of lifting and fixing systems to the construction industry. Our name is synonymous with value, offering cost-effective, technically superior solutions to suit any application, while delivering a level of service that sets us apart from the competition. Achieving such high esteem within the market has been possible through the drive, passion and commitment of the whole CFS team, who, for more than a decade, have held true to our company philosophy: CFS Focusing on customers – delivering on promises – building the future.

Construx
www.construx.be

Construx is one of Europe's leading mould makers for precast plants and on-site use. We do in house engineering, designing and manufacturing of Precast Moulds and Machinery and Formwork for Civil Engineering. We have more than 15 years of experience in the production of forms and moulds for beams, columns, walls, floors, stairs, culverts, shafts, tanks, basements, cabins, pods, retainer walls, drainage channels, retainer walls, prestressed elements and production lines.

Cooper Research Technology
www.cooper.co.uk

Established in 1990, Cooper Technology is a British company and one of the world leaders in the design and manufacture of high performance testing equipment for asphalt, bitumen, concrete, cement, soil and aggregates used in civil engineering. Cooper have more than 350 concrete testing products and related accessories in the product portfolio, which include compression and flexural testing machines, products for fresh concrete testing, hardened concrete testing and non-destructive testing.

Cordek Ltd
www.cordek.com

Cordek supply complex patterns and moulds for the Precast industry. Our flexible Project Design Process will complement your in-house resources for projects of any size. Our construction expertise and CAD/CAM resources combined with a range of materials allow us to provide our customers with the optimum solution to meet their requirements. Dimensional accuracy is assured with digital scanning which can also be used for reverse engineering of complex shapes.

Construction Systems Marketing (UK)
www.csm-uk.co.uk

CSM supply a range of products and services to the precast concrete industry to meet the demands of modern construction, these allow precast companies to add value with a minimum of additional effort and cost. These include Thermomass thermally broken sandwich panel systems in both composite or non-composite walling panels along with all relevant "U" value calculations, technical engineering support etc. and the Versaliner brick placement along with the truly random stone effect liner systems.

Dywidag
www.dywidag-systems.com/uk

DYWIDAG-Systems International (DSI) are an internationally recognised Group which has been working successfully in the UK since 1968. DSI offer a comprehensive range of accessories and customised technical solutions for concrete structures, which for the precast industry include lifting and fixing systems, construction chemicals and fully threaded bar connection systems. DSI are centrally located in Southam, Warwickshire, from where it is able to serve the whole of the UK, Ireland and the Channel Islands.

E3 Recruitment
www.e3recruitment.com

E3 Recruitment's Building and Construction Products Team is a specialist provider with a dedicated focus on the supply of materials to manufacture products used for building and construction, concentrating on permanent and contract opportunities. Our in-depth knowledge and expertise allows us to work closely with leading manufacturers, priding ourselves on our reputation for building long-lasting relationships with our clients and candidates alike.

Ecocem Ireland
www.ecocem.ie
www.ecocem.co.uk

Ecocem, Europe's largest independent producer of GGBS operates import terminals in Runcorn (NW) and Sheerness (SE) which, have a combined service capacity of approximately 500,000 tonnes. New product solutions emerging from the company's innovation group over the past 18 months have enabled higher percentage use of GGBS in the production of precast concrete products. Innovative solutions targeting the precast market will remain a priority focus for Ecocem.

Ecoratio
www.ecoratio.com

Ecoratio specializes in developing and supplying environmental friendly release agents for all concrete applications. As well as products to protect and clean mixers, hotmelt, plotter paint, polystyrene remover and rail oil. All products are specifically developed to perform under the most diverse production methods and weather conditions. We focus on providing extensive and ongoing technical support. Ranging from general technical support to custom built spray systems, personalized product trials and product training for all factory workers.

EKC Systems Ltd
www.ekcsystems.co.uk

EKC Systems are a leading equipment and services supplier to the prestressed concrete industry with experience spanning over 4 decades. Through our well-established agencies and relationships, we offer a wide variety of products and services including prestressing safety awareness training which is essential in the modern workplace. Our clients can also feel confident in our onsite servicing minimising any downtime to production. Whether you are looking for cast in accessories, laboratory testing equipment to full turnkey solutions EKC Systems can deliver.

Elematic OY AB
www.elematic.com

Elematic is the world's leading supplier of precast concrete machinery, production lines and complete production plants. The superior technology and industry expertise of Elematic is currently at work in more than 100 countries, across five continents. Elematic products include complete plants, precast concrete machinery and equipment, FaMe magnets and other accessories, production planning software and other technology for precast concrete industry.

Erico / Pentair Group
www.erico.pentair.com

Pentair Electrical & Fastening Solutions is a leading global manufacturer and marketer of superior engineered products for niche electrical, mechanical and concrete applications. These Pentair products are sold globally under a variety of market-leading brands: ERICO welded electrical connections, facility electrical protection, and rail and industrial products; CADDY fixing, fastening and support products; ERIFLEX low voltage power and grounding connections; and LENTON engineered systems for concrete reinforcement.

Fosroc
www.fosroc.com

Fosroc manufactures and supplies an extensive and comprehensive suite of products, partnering with our customers to deliver complete solutions for virtually any type of construction project. In addition to Fosroc® Auracast and Conplast admixtures, our range of products includes demoulding agents, sealants and concrete repair products and our new Conbextra PM and BM grouts designed specifically for the precast market.

GCP Applied Technologies
www.gcpat.com

GCP Applied Technologies provides a full line of innovative products and technologies for the precast/prestressed concrete industry. GCP portfolio includes chemical admixtures, fibers and unique technologies such as AIRtrac™ that enhance aesthetics, quality and durability of concrete, while improving production efficiency. GCP products have been used to build some of the world's most renowned structures.

Hanson UK
www.hanson.com/uk

Hanson Cement has an unrivalled range of bulk cements and Regen GGBS ready for delivery nationwide through our own extensive delivery fleet. Hanson Cement's range of bulk and packed cements include White Cement, CSA cement and also Regen GGBS. Hanson Cement is a division of Hanson UK, owned by the HeidelbergCement Group which employs 53,000 people across five continents. HeidelbergCement is the global leader in aggregates and a leader in cement and concrete.

HAVSco
www.havscos.co.uk

See HAVSense, the world's first Hand Arm Vibration dosimeter which accurately measures and records, actual vibration dosage entering the operator's fingers when using power tools. See how to reliably meet the requirement for HAVS monitoring, without relying on inconsistent manufacturer's data, irrespective of how many different tools are used. No guesswork, no complex calculations or time recording, just actual HAV dosage in a choice of formats including HSE points, simple.

Hendriks Precon
www.hendriks-precon.com

We are a team of specialists. It starts with engineering and ends at assembly of the production floor. We have a deep understanding of the entire product line. And we know your product too: concrete. We have been producing moulds and steel formwork for infrastructure projects with dedication and professional workmanship for over 50 years. From floor slabs, grandstand formwork and environmental containers to fly-overs. Using high spec equipment, we ensure top quality and low tolerances for your final product.

Hycontrol
www.hycontrol.com

Worcestershire-based Hycontrol has been at the forefront of level control and silo protection technology for over thirty-five years, providing effective solutions for diverse applications across the concrete sector. Offering the widest range of level measurement technologies including award-winning silo pressure safety systems, supported by a team of highly experienced engineers and technicians, Hycontrol is a leading force in the manufacture and supply of advanced level solutions.

Inform
informuk.co.uk

Inform UK Ltd brings to the Precast Industry the most innovative products for connecting, sealing and handling precast elements, as well as production facility expertise and cutting-edge processes. Our 'solutions focussed' approach means that we pride ourselves in bringing safe, labour saving solutions to both the factory and the contractor. Close collaboration with European manufacturers enables us to bring these solutions to the UK Industry with speed, accuracy and expertise.

INTER-MINERALS
www.interminerals.com

Inter-Minerals is an independent family business, specialised in supplying colour aggregates in different gradings for diverse applications. We offer a broad variety of CE-certified products, so our customers can fulfil the needs of a fast-changing market. Our products are used in prefabricated wall panels, architectural concrete, concrete pavers, road construction, decorative ready-mix concrete, terrazzo, concrete tiles etc. For others it's a niche market, for us its core business.

Invisible Connections
www.invisibleconnections.co.uk

J&P Building Systems
www.jp-uk.com

LIEBHERR

Liebherr-Great Britain
www.liebherr.com

LONG RAKE SPAR
Specialist Decorative Aggregates

Long Rake Spar
www.longrakespar.co.uk

Mapei UK
www.mapei.co.uk

Martek Industries
www.martekindustries.co.uk

Invisible Connections is the registered trademark of Invisible Connections AS, the Norwegian developer of telescopic connection systems used worldwide. The ETA approved connectors solve two key construction applications; 'invisible' connections for precast staircase construction and 'invisible' connections for precast beam construction. Invisible Connections supplies the CARES approved FERBOX reinforcement continuity system, which is bespoke-manufactured for in-situ concrete connections. Our products appeal to precast concrete manufacturers and in-situ concrete frame contractors who appreciate the fuss-free ease with which precast or in-situ elements can be connected.

J&P is the UK supply partner for its three parent companies; H-Bau, Jordahl and Pfeifer, internationally established business operations. Our products have been developed to assist reinforced concrete construction (precast and in-situ) but we are also adept at solving the special demands of hybrid construction, i.e where reinforced concrete and structural steel technologies meet. On a local level, we fabricate fixing solutions which are often derivatives of our parent companies' products.

With over 60 years' experience in the manufacture of concrete mixing technology, Liebherr offers a range of industry-leading concrete mixing systems to suit all your precast production requirements. Our mixers are subjected to rigorous testing and continual product development resulting in leading-edge mixing technology providing maximum ease of operation. Designed to be quick and easy to clean and service Liebherr mixing solutions ensure years of optimised concrete production.

Long Rake Spar is the leading UK importer and supplier of hard landscaping stone. Sourcing products from quarries around the world, we are able to offer the widest selection of decorative aggregates in the market. These include an extensive selection of chippings, gravels, slates, pebbles and cobbles along with rockery/feature stones and boulders. We also produce a selection of washed and dried aggregates for resin-bound surfacing and traffic management schemes.

A family business with 80 years' experience, Mapei is the world's leading manufacturer of adhesives, sealants and chemical products for building. With products spanning 15 product lines, Mapei is a specialist in the production of quality products for the installation of wall and floor coverings, complete waterproofing systems, admixtures, and repair products for concrete. Mapei also offers a free, expert specification service providing tailored advice for every project, recommending materials and workmanship required along with current technical assistance.

Coding and labelling specialist and Certified EBS distributor since 2000 supplying all EBS handheld and fixed industrial inkjet printers across the UK and Ireland. EBS260 and EBS250 printers offer a professional alternative to stencils or paint pens allowing text, logos and barcodes to be printed. Martek has developed a range of accessories specially for marking concrete products designed to protect the printers and allow awkward shaped items to be marked.

Max Frank Ltd
www.maxfrank.co.uk

MAX FRANK LTD. specialises in the design and manufacture of a diverse range of structural products to enhance the quality and durability of reinforced concrete construction. Part of a leading international group, Max Frank's product range includes; formwork liners, extruded fibre reinforced concrete spacers, sealing systems and reinforcement technologies.

Construction Products Ltd

Miers Construction Products
www.miersconstructionproducts.co.uk

Miers Construction Products Ltd are a leading independent supplier of concrete accessories in the UK. We are based at 6 strategic locations across the country supplying a large range of concrete and reinforcement products. At Precast 2018 we are showing Rivestop and innovative new system for sealing formwork tie holes in concrete.

Mentor Training Solutions Ltd
www.mentortrainingsolutions.co.uk

Mentor are the UK's leading provider of equipment operator training and associated safety services. Specialising in training to the precast industry with courses accredited by MPQC, NPORS, AITT and ALLMI for all types of fork lift truck, crane and mobile plant equipment. Vocational Qualifications are also available via our Serac business, providing the complete route to competence. Mentor are also a lead apprenticeship training provider offering specific precast programmes for the Level 2 Mineral Processing Mobile and Static Plant Operator Apprenticeship Standard.

MPA The Concrete Centre
Concretecentre.com

The Concrete Centre provides material, design and construction guidance. Our aim is to enable all those involved in the design, use and performance of concrete and masonry to realise the potential of the material. The Concrete Centre provides technical design guidance through printed and online resources, events & training for designers and constructors and is publisher of Concrete Quarterly magazine. MPA The Concrete Centre is part of the Mineral Products Association, the trade association for the aggregates, asphalt, cement, concrete, lime, mortar and silica sand industries.

Moulded Foams Ltd
www.mouldedfoams.com

Designers and manufacturers of the revolutionary new patented GT thermal floor insulated system that can be used in conjunction with microfiber reinforced concrete. The lightweight thermally infill panels attach to high density load bearing EPS rails to create a strong thermally efficient floor that is both easy and very quick to install, removing the need for any heavy lifting, grouting between double beams, and any additional sheet insulation.

Net Temps Ltd
www.net-temps.co.uk

Net Temps Limited is a recruitment business delivering quality workforce solutions to clients within the precast, construction, utility, engineering and manufacturing sectors. We provide proactive and innovative solutions to the supply of temporary labour, professional contractors and permanent staffing.

Oscrete Construction Products
www.oscrete.co.uk

Oscrete Construction Products has a reputation for providing innovation, experience and first-class partnering to the precast concrete, readymix and the ready-to-use mortar industries. The Oscrete Concrete division manufactures a range of high performance super-plasticising admixtures, waterproofing agents and efflorescence controllers which consistently deliver high value technical solutions to clients across the concrete industry. Oscrete Construction Products provides product quality excellence supported by highly trained technical support staff enabling our customers to innovate, continually develop their products and add value to their business.

Patterns & Moulds
www.patternsandmoulds.com

Patterns and Moulds have been transforming ambitious construction projects for over 50 years. Manufacturing standard to bespoke moulds utilizing the problem-solving skills of our expert craftsmen alongside technically advanced machinery, including 4 large scale 5 axis CNC machines enabling us to deliver practical solutions to your project no matter how innovative or complex. taking your idea from a sketch to CAD drawing or 3D model which we can progress to a high-quality production mould.

Peikko Group Ltd
www.peikko.co.uk

Peikko Group Corporation is a leading global supplier of concrete connections and composite structures. Peikko's innovative solutions make the customers' building process faster, easier and more reliable. Peikko has sales offices in over 30 countries in Asia, Europe, North America, and the Middle East with manufacturing operations in 9 countries. Peikko will feature column to column and column to beam connections used in UK towers and commercial precast frames.

Polarmatic OY
www.polarmatic.fi

Polarmatic offers total solutions - from process design & sizing of equipment and systems, to equipment delivery, installation and implementation of fully functional systems, complemented by preventive maintenance and technical services. The innovative solutions enable customers to increase their annual production and produce high quality concrete products in the most environmentally friendly manner. Polarmatic's solutions are today utilized by ready-mixed and precast concrete producers all over the world.

Precast Construction Technology
www.pct.uk.com

Since our inception in 2009 Precast Construction Technology Ltd has been supplying high quality fixing, lifting, precast accessories and now the addition of void tube products to the precast industry. PCT is proud to be at the forefront and in many cases the first-choice supplier offering a dedicated design and testing service along with the security of CE Marked products.

Probst Handling & Laying Systems
www.probst.eu

Probst Handling Equipment have been a supplier of materials handling equipment within the UK for 30 years, our equipment is manufactured at our head office in Germany and has been in operation for over 50 years. Over this time, we have become a trusted name for quality products- our range of items include: vacuum systems, mechanical grabs, hydraulic grabs, all of which are used primarily for the lifting of concrete products.

Procter Johnson
www.procterjohnson.com

Procter Johnson is a leading supplier of pigments and additives to the concrete industry and services customers in over 40 countries, spanning 5 continents. This is serviced from our facilities in the UK & China. Our main factory and head office is located in the United Kingdom and has been awarded ISO9001, ISO14001 & OHSAS 18001.

PROGRESS GROUP

PROGRESS GROUP GmbH
www.progress-group.info

PROGRESS GROUP is the leading Technology Supplier to the Precast and Rebar Industry. The machines and plants are designed for the production of precast walls and floors, hollow core slabs, constructive and pre-stressed precast elements as well as wire reinforcement. Consisting of 5 mechanical engineering companies EBAWE Anlagentechnik, Progress Maschinen & Automation, Tecnocom, Echo Precast Engineering, UltraSpan Technologies. As well as the precast concrete producer PROGRESS and the software developer Progress Software Development. PROGRESS GROUP acts as a full-range supplier, providing "all from one source".

PUK services

PUK Ltd
www.pukservices.co.uk

PUK Ltd has been providing quality precast concrete machinery and services for over 40 years. PUK currently represent the following leading manufacturers: Apilion – Cage Welding Machinery, Bianchi – Specialist mould and equipment supplies to the Precast Industry, HawkeyePetershaab – Pipe and Manhole Machinery and components, MCT – Batching Plant and Concrete Distribution equipment, Nordimpianti - Hollow core, Lintel and T-Beam machinery, Penta – Block, Brick & Paving Handling and ageing machinery, Quadra – Block Paving, Semi Dry and Wet Cast machinery.

RFA-TECH

RFA-Tech
www.rfa-tech.co.uk

RFA-TECH supply an extensive range of Precast lifting and fixing products and systems for Precast concrete manufacturers. RFA also manufacture products in the UK. We provide engineered solutions for bespoke precast applications offering sales and technical backup to assist in all types of projects. We work closely with all our customers to ensure that they are using the most economical and safest products throughout their production.

ROCO

MANUFACTURING SOLUTIONS

Roche Manufacturing
www.roco.ie
www.rocheconcretemachinery.com

Roche Manufacturing specialises in the design and manufacture of production solutions for the precast concrete industry and has been supplying customers around the world for the past 30 years. Founded in 1988, Roche manufacturing is located in Galway, Ireland. The company's focus is on providing customised systems and machinery that delivers cost savings, improved health & safety, and a better standard of finished product to precast and wet cast concrete producers.

Schöck

Dependable by design

Schöck
www.schoeck.co.uk

Schöck has grown to become Europe's leading supplier of innovative load-bearing insulation products. The main product is the Schöck Isokorb® – a thermal break for a variety of connectivity applications such as balconies, canopies, brise soleil and even parapets. Additionally, there is the Schöck Isolink® available: Thanks to its special characteristics, Schöck Isolink® not only acts as a connecting element, it also results in a significantly improved thermal insulation of the wall.

Search Consultancy
www.search.co.uk/concretemanufacturing

Search has an established database of professional concrete personnel to supply Temporary and Permanent labour to the Precast industry. As an Associate Member of the British Precast, we are proud to be a recruitment partner to a number of its members. Working with the top suppliers and manufacturers we have built an enviable reputation amongst both candidates and clients alike for our commitment to delivering high quality recruitment solutions.

SICOMA MIXERS
www.sicomamixers.co.uk

SICOMA is specialized in manufacturing, sales and service of Concrete Mixers used in the production of several types of concrete: Readymix, Precast / Prestress, Dry Cast, SCC, UHPC, UHPFRC, RCC paving and RCC dams. SICOMA mixers are also used in Bulk Materials Dry Blending, Glass Industry, Waste Treatment and Chemical Industry and they are well known for their reliability and innovative technical solutions that allow the equipment to suit the most demanding applications worldwide.

BUILDING TRUST
Sika UK Ltd
<http://gb.sika.com>

Simply Precast Accessories
www.simply-precast.co.uk

Sika has a proven track record of working on buildings and civil engineering structures constructed with concrete. Sika develops and markets numerous admixtures and additives for use in concrete, cement and mortar production. Using innovative admixtures and additives to improve cement or concrete quality, Sika can provide an extensive product range of cost effective solutions.

Spiroll
www.spiroll.co.uk

Simply Precast, a one stop shop for all of your precast concrete accessory needs. We have exclusive partnerships with some of the largest names in the industry to provide the most premium service to our customers. Some of our partners include, Philipp Gruppe and STARCON for lifting accessories and connection systems. RATEC for magnetic shuttering and Progress group for machinery. Simply Precast and our partners are here to provide you with the trusted service and quality you deserve.

StruSoft
www.strusoft.com

Spiroll delivers technology and solutions for precast concrete manufacture across the world, providing machinery and support that achieves a quick payback. Complete solutions include design and build of low-cost entry start-ups, comprehensive factories and on-site manufacturing plants. Spiroll also offers a comprehensive range of prestressing equipment, accessories and related services. It has a national accredited prestressing training scheme and provides consultancy and advice to support new and existing precast projects.

StruSoft AB has been a leading engineering software provider for the building industry for more than 30 years, with over 10,000 users in 20 different countries. StruSoft has achieved this by innovative and visionary development, working in close co-operation with leading Precast Factories, Consulting Companies, Construction Companies and Engineering Companies around the world.

Styrene Packaging & Insulation
www.styrene.biz

Styrene Packaging & Insulation – the UK's leading manufacturer of Expanded Polystyrene (EPS). With over 30 years' experience in supplying EPS for insulation and construction applications, we pride ourselves on the quality of our products, innovation and service provided to our customers. We manufacture and supply a range of EPS insulation products, including suspended floor insulation products for use with precast concrete T-beams, to provide superior thermal performance to floors.

The CPD Certification Service
www.cpduk.co.uk

The CPD Certification Service was established in 1996 as the leading independent CPD accreditation institution operating across all industry sectors to complement the Continuing Professional Development policies of professional institutes and academic bodies. BECOME ACCREDITED The CPD Certification Service provides support, advice and recognised independent CPD accreditation compatible with global CPD principles, helping manufacturers & suppliers to formalise their expertise into a structured and recognised approach to learning.

The Concrete Society
www.concrete.org.uk

The Concrete Society, founded in 1966 is an independent membership organisation offering a comprehensive portfolio of products and services including an impartial technical advisory service, publications and magazines, information services and networking opportunities within the industry.

The Institute of Concrete Technology
www.theict.org.uk

The Institute's mission is to preserve and promote concrete technology as a recognized engineering discipline and to consolidate the professional status of practicing concrete technologists worldwide. Membership of The Institute of Concrete Technology, now incorporating Concrete Society membership, is open to a wide range of people with a professional interest in concrete – from students through to those that have worked in the industry for many years.

Yara UK Ltd
www.yara.co.uk

Yara NitCal® is used in Precast to 'speed' production, prevent micro cracking and counteract compressive strength loss in freeze/thaw concrete. Yara NitCal® is extensively used for cold weather concreting preventing delays due to slow set. Yara NitCal® also has a corrosion inhibiting effect for reinforced concrete. Yara have over 100 years of experience as a global supplier of industrial chemicals, technical support and research.

From design to reality

Woonzorgcentrum De Polbeek (Holland)

Tekla Structures is intelligent 3D modelling software designed to help you deliver all types of precast concrete elements at the right time to the right place. Integrating design and detailing with manufacture, project management and efficient information sharing.

Together we are shaping a smarter future for construction.
